The solar-powered red dot sight with adjustable mounting is designed to fit all airsoft replicas.

The **BO Manufacture Red Dot OCX-3** combines a **solar panel** , **height-adjustable mount** , and **6061-T6 CNC aluminum** construction. Its battery- or battery-free operation, **19 brightness levels** , and **magnifier** compatibility make it a high-performance and versatile **airsoft red dot sight** .

- **Magnification:** 1x
- **Lens diameter:** 25 mm
- **Mounting:** 21mm Picatinny Rail
- **Body:** CNC 6061-T6 Aluminum
- **Power supply:** CR2032 battery or solar panel
- **Light intensity:** 19 levels
- **Battery life:** Up to 350 hours
- **Settings:** Elevation and windage
- **Mounting:** Height adjustable
- **Accessories included:** Killflash, Allen key, cleaning cloth, protective caps
- **Weight:** 165 g
- **Colors:** Red, Gray or Blue

A red dot sight designed for airsoft

The **BO Manufacture Red Dot OCX-3** is designed for **airsoft** players seeking reliable, modern, and robust equipment. Its compact design easily integrates with most replicas equipped with a **21mm Picatinny rail** , whether in CQB or outdoor games.

Solar powered and CR2032 battery

Its **solar panel** allows the **red dot sight** to operate even without a battery when ambient light is sufficient. In battery mode, powered by a **CR2032** battery, it offers up to **350 hours of autonomy** . After approximately three hours of inactivity, it automatically switches to solar mode to conserve battery power while remembering the last brightness level used.

19 brightness levels

The **red dot** sight features **19 easily adjustable intensity levels** via the side buttons. This wide adjustment range ensures excellent reticle visibility in all lighting conditions encountered in the field.

Exclusive adjustable mounting

The height-adjustable mount allows the **red dot sight** to be easily adapted to different platforms and positioned in front of a **magnifier** if necessary. This modularity facilitates mounting on most **airsoft** replicas.

A design built to last

Machined from **CNC 6061-T6 aluminum** , the housing offers excellent rigidity while maintaining a low weight of 165 g. The rudder and elevation turrets are protected by caps that can also be used as adjustment tools. The included killflash reduces lens flare and effectively protects the optics.

FAQ

Does the red dot work without a battery?

Yes. Thanks to its solar panel, it can operate without batteries when there is sufficient ambient light.

Is this model compatible with a magnifier?

Yes. Its height-adjustable mount allows it to be easily aligned in front of different magnification models.

What accessories are included?

The sight comes with an Allen key, a cleaning cloth, a killflash and protective caps for the lenses.
