The KRISS Vector Gen3 in TAN finish

The **KRISS Vector SBR GEN3 5.5" FDE** is a compact semi-automatic rifle chambered in **9x19mm** or **.45 ACP** , designed for dynamic **target shooting** . Its exclusive recoil management technology offers remarkable stability and excellent responsiveness on the firing line.

- **Barrel:** 5.5" 4140 Chrome Moly steel, Black Nitride finish
- **Thread:** 1/2x28 (9x19mm) or .578x28RH (.45 ACP)
- **No scratches:** 1:10
- **Stock:** GEN3 skeleton telescopic type
- **Magazine compatibility:** GLOCK magazines
- **Relaxation:** single stage openwork, 0.7 mm pre-race
- **Handguard:** M-LOK
- **Controls:** Ambidextrous selector switch and charger button
- **Disassembly:** quick and tool-free using 4 pins
- **Supplied with:** 10-round magazine, flip-up sights, maintenance kit

A platform designed for dynamic sport shooting

On a **target shooting** range, every fraction of a second counts. This 5.5" SBR version stands out for its **compactness** and immediate handling. The rifle shoulders naturally, and the grip is instinctive - you quickly feel that everything has been optimized for responsiveness.

Super V Reversing Technology

The heart of the system lies in the **Super V** mechanism, incorporating a bolt with delayed opening. In practical terms, the recoil movement is directed downwards, limiting muzzle rise. The result:

linear recoil , improved control during rapid fire, and noticeably greater comfort, even at high rates of fire.

5.5" threaded barrel and controlled precision

Its **4140 Chrome Moly steel barrel** with a **Black Nitride** finish ensures robustness and longevity. The **1:10 twist rate** promotes optimal stabilization of 9x19mm or .45 ACP projectiles. The **1/2x28** or **.578x28RH** thread allows for the mounting of compatible accessories in accordance with current regulations.

Redesigned GEN3 ergonomics

The third generation brings a true ergonomic evolution. The **skeletonized telescopic stock** , inspired by the earlier versions, improves compactness while maintaining good shoulder stability. The **single-stage trigger** with a short pre-travel (0.7 mm) offers a crisp and consistent break - a real advantage for accuracy in double-shot situations.

Modularity and customization

The **M-LOK handguard** opens the door to numerous configurations (lights, grips, accessories). The **interchangeable MILSPEC pistol grip** allows for ergonomic customization to the shooter's preferences. Compatible with **GLOCK magazines** , this platform simplifies logistics for users already equipped with them.

- **Finish:** FDE (Flat Dark Earth)
- **Category:** B (subject to authorization)
- **Use:** target shooting at a shooting range
- **Sights:** Flip-up

FAQ

What are the purchase conditions?

The KRISS Vector SBR GEN3 is classified in category B. Its acquisition is subject to valid prefectural authorization and a valid shooting license.

Is it compatible with all GLOCK magazines?

It is compatible with GLOCK magazines of the corresponding caliber (9x19mm or .45 ACP depending on the version), in compliance with the legal capacity allowed.

What kind of maintenance should be planned?

Regular cleaning of the barrel, chamber, and bolt system is recommended after each shooting session. Quick, tool-free disassembly facilitates routine maintenance.
