A compact, full-metal airsoft replica designed for speed, accuracy, and modern tactical play.

The **Lancer Tactical MGC4 MK3 M4 AEG Black** is a compact **electric airsoft** replica in SBR format designed for players seeking maneuverability, rate of fire, and modularity. Its full metal construction and advanced electronics offer a responsive gaming experience both in CQB and outdoor environments.

- **Energy:** 1 Joule
- **Magazine capacity:** 130 BBs
- **Body:** Full metal billet
- **Rail:** M-LOK 9.5 inches
- **Internal barrel:** 6.03 mm Tight Bore
- **Motor:** NEO High Torque 25K
- **MOSFET:** Nebula2 programmable optical sensor
- **Hop-Up Unit:** New TDC Hop-Up Unit Best Flight Performance Sky Blue, improving tuning and accuracy
- **Gear set:** Steel 16:1
- **Hop-up:** Rotary
- **Trigger:** Blade Trigger plate
- **Controls:** Ambidextrous
- **Spring system:** Quick Change Spring
- **Sights:** Flip-up front and rear
- **Included accessories:** Dummy metal QD sound moderator
- **Color:** Black

An SBR format designed for CQB and dynamic play

The **Lancer Tactical MGC4 MK3** features an SBR profile, particularly well-suited for rapid movement and confined environments. Compact, agile, and highly maneuverable, it offers excellent mobility in buildings, narrow corridors, or dense wooded areas.

The 9.5-inch M-LOK rail provides ample space for mounting **airsoft optics** , a tactical light, or a vertical grip without adding unnecessary weight. In practice, its overall balance and intuitive handling are immediately apparent.

Full metal construction and modern finishes

The full-metal billet receiver provides a realistic feel and excellent durability on the field. Ambidextrous controls make it easy to use for both right- and left-handed players, a real advantage during quick transitions.

The new generation NSR stock improves user comfort while offering more space to accommodate different LiPo battery configurations.

Optimized internal performance

Internally, this replica benefits from significant improvements over previous generations. The 16:1 steel gears improve the cycle speed while maintaining excellent mechanical durability.

The NEO High Torque 25K motor ensures a fast rate of fire and quick trigger response. Coupled with the Nebula2 programmable MOSFET with optical sensor, the system delivers a particularly smooth and responsive shooting experience.

The rotary hop-up system improves the consistency of the adjustment while the 6.03 mm Tight Bore inner barrel contributes to better accuracy at medium range.

Configuration ready for customization

The included suppressor-compatible flash hider and dummy QD sound moderator instantly enhance the platform's tactical look. This modern configuration allows for a replica with a distinctive style while maintaining excellent handling.

- **Compatibility:** M-LOK and Picatinny accessories
- **Programming:** Advanced functions via Nebula2 MOSFET
- **Responsiveness:** Low resistance cabling
- **Maintenance:** Quick spring change system
- **Style:** Compact tactical SBR-type configuration
- **Use:** Recreational airsoft, CQB and outdoor field

FAQ

Is this replica suitable for CQB?

Yes, its compact SBR format and high maneuverability make it particularly suitable for CQB environments and rapid movements.

Is the supplied silencer functional?

The QD sound moderator provided is a dummy model intended for the aesthetics and realism of the airsoft replica.

Does the Nebula2 MOSFET allow for advanced settings?

Yes, the programmable Nebula2 MOSFET allows for different electronic configurations to optimize the performance and responsiveness of the replica.
