A classic Pump-Action shotgun revisited, ideal for Cowboy Action Shooting and western hunting.

The Silver Spur is a pump-action rifle combining proven mechanics and traditional finish, intended for Western competitions and shooting ranges.

- **caliber:** .45 Long Colt
- **reset mode:** manual / pump
- **capacity:** 9 + 1
- **barrel length:** 610 mm
- **total length:** 1038 mm
- **no scratch:** 1:16
- **thread:** no
- **stock material:** wood (walnut, English finish)
- **weight:** approx. 3.1 kg
- **sight:** adjustable metal

The **Silver Spur** presents itself as a discipline weapon: careful balance, clean movements and aesthetics faithful to western timepieces. It is aimed at shooters who are looking for a handy pump, reliable over time and immediately ready for competition.

Ergonomics and handling

The **English walnut stock** provides good shoulder contact and a secure grip; the curved buttplate facilitates the quick transitions characteristic of the **Cowboy Action** . The pump, calibrated for smooth travel, provides confident tactile feedback with every cycle.

Pit performance

The 610mm round barrel provides a consistent trajectory in **.45 Long Colt** . The modernized mechanics ensure uniform feeding, allowing for clean rounds and repeatability appreciated in training and competition.

Options and compatibilities

The **adjustable metal sight** allows for fine adjustment for western events; the internal design accepts most commercial **.45 Long Colt** ammunition thanks to the improved retainers. The architecture allows, if necessary, the adaptation of stand-compatible accessories.

Maintenance and longevity

Regular maintenance-cleaning the barrel, lubricating the pump, and inspecting the retainers-is sufficient to maintain performance. Surface treatments and the quality of the wood limit aesthetic maintenance while protecting the active parts from wear.

Case hardening

The **case hardening** process hardens the case surface while maintaining a ductile core. It protects against mechanical wear while providing a characteristic marbled color, a hallmark of traditional and durable manufacturing.

Mobile cartridge retainers

The **moving cartridge retainers** follow the bolt's movement to hold the cartridge during elevation and then release it cleanly when chambering. Their action improves feeding reliability and the smoothness of operation felt by the shooter.

Tubular magazine

The **tubular magazine** under the barrel provides a large capacity while maintaining a low center of gravity, promoting stability and maneuverability when aiming quickly.

- **case finish:** case-hardened (marbled bronze)
- **store:** internal tubular
- **plates:** curved metal butt plate
- **use:** Cowboy Action Shooting / western sports shooting
