Serial number unique to the replica

History of AK-74:

Commissioned in the Soviet Union in 1974, the Avtomat Kalashnikova (Ak) 74 replaces the AKM directly derived from the AK47 in the original caliber of 7.62 x 39 mm. In order to imitate the NATO countries, which adopt a smaller caliber ammunition in this case the 5.56x45 mm, the USSR decides with much delay, to chamber their new AK74 assault rifle, in caliber. reduced: the 5.45 x 39 mm M74.

The similarities with AKM are many. However, improvements are made, such as the stock which is collapsible, the adoption of bakelite for magazines, the increase in the length of the weapon and the modification of the muzzle brake.

It will be gradually replaced from 2012 for the current AK-12.

History of the MOS brand:

The MOS Manufacture brand installed in HONG KONG, is first of all known for its manufacture of accessories for airsoft, with an excellent quality / price ratio, recognized by all.

Eager to develop their own replica, it offers a very qualitative range, acclaimed by airsofters: ARCTURUS
