ML3342	12/70 steel n°6	C	cal. 12	70 mm	16	410	Wad	6	12.00 € incl. tax

Steel cartridges for hunting near wetlands.

Vouzelaud patented ACP bourre injected in the Greenwad® biodegradable material. Loading at 410 m / s. Cartridge is intended for proven steel shotguns "fleur de lys".

The greenwad ACP cartridge is equipped with ACP wadding patented by Vouzelaud, injected into the greenwad® biodegradable material, it will disappear naturally in nature. This major innovation limits the impact of the fluff on the environment and the performance is there.

70 ACP performance steel has the same general characteristics as "70 ACP steel". Its loading at 410 m/s with the ACP generation 2 wad gives it good efficiency and the high performance standard allows the use of larger grains than the ordinary standard does not allow. It is intended for proven 'fleur de lys' steel ball rifles.

Power is optimized at greater distances thanks in particular to the ACP generation 2 wad.

- Star closure
- 12 calibers in 28 g with 16 mm brass base
- Sold in boxes of 10 cartridges
