**RWS Cal. 30r Blaser type EVO-UNI-KS-DK**

<https://www.europarm.fr/en/produit-3149-RWS-Cal.-30r-Blaser-type-EVO-UNI-KS-DK>

| SKU    | Designation | French Law | Caliber      | Bullet type | Energy (J) | Speed (m/s) | Pack. | Grains | MSRP               |
|--------|-------------|------------|--------------|-------------|------------|-------------|-------|--------|--------------------|
| RWS350 | EVO type    | C          | .30 R Blaser | Evolution   | 4230       | 840         | 20    | 185    | 132.00 € incl. tax |
| RWS352 | UNI type    | C          | .30 R Blaser | UNI Classic | 4312       | 860         | 20    | 180    | 120.00 € incl. tax |
| RWS354 | type DK     | C          | .30 R Blaser | DK          | 4046       | 870         | 20    | 165    | 117.00 € incl. tax |

The RWS ammunition is:

- Reliability
- versatility
- Precision
- Non corrosive
- Efficiency
- Innovation

For more than a century, the Rheinisch Westfälische Sprengstoff-Actien-Gesellschaft, or RWS, has produced quality ammunition intended for hunting, sports shooting and long-distance shooting (TLD).

The different warheads and their characteristics:

- **DRIVEN HUNT:** deformation warhead, made of copper, designed specifically for driven hunting. The projectile with its flat tip, its boat-tail base as well as its performance grooves guarantee exceptional stopping power with maximum residual weight, even at short distances. Driven Hunt bullets do not contain lead (lead free).

- **EVOLUTION GREEN:** lead-free bullet with limited fragmentation. Neutral tin core, to guarantee food safety. Thanks to its pre-fragmented front core and Speed Tip, the Evolution Green ogive provides strong stopping power at long distances.

- **HIT:** lead-free expansive projectile, with a constant weight on a non-malleable base. The assembly guarantees rapid mushrooming of the warhead, generating strong stopping power. It is perfectly suited to

hunting medium game.

- **SPEED TIP:** cartridge equipped with a Speed Tip projectile with a tip having low air resistance to maintain a straight trajectory. The rear part of the projectile, V-shaped, ensures precision and stability of the trajectory, to combine regularity and maximum stopping power.

- **UNI CLASSICS:** developed especially for big game hunting. The harder and heavier rear core deploys its effects more deeply, imparting high stopping power and consistent fragmentation.

- **KS CONICAL POINT:** controlled expansion warhead resulting from the combination of ideal liner thickness and lead core density. The external shape of the projectile guarantees low air resistance.
