The reference for balls for big game!

The central arrow is aluminum, it is recommended for light rifles or for shooting deer.

Provides an important shock effect and optimal penetration thanks to its penetrator arrow.

- Speed (VO) 445 m / s - Energy (E0) 2425 days

The bullet "Proud" is a projectile consisting of 4 parts in caliber 12 and 16.

- A central arrow to ensure significant penetration,
- A hammer mass in which to insert the arrow, to release the kinetic energy,
- A 2-piece container that encloses the whole.

It flies in one piece and hangs the obstacle very well, it is a little less sensitive to ricochets. The central arrow and hammer mass are released only upon impact on the animal and penetrate deeply.

The qualities of the Fier projectile:

- Strong energy at impact
- Moderate pressure and passage without damage in chokes
- High quality French encartouchage
- CIP compliant
