A large-format horn with a Magnum tip for powerful and distinctive signals.

The **ELLESS DIANE 45 Polished Hunting Horn** is designed to provide excellent sound projection during group hunts. Its curved shape ensures a comfortable grip, while its Magnum mouthpiece promotes a powerful and well-projected sound.

- **Pavilion length:** 45 cm
- **Finish:** Polished
- **Mouthpiece:** Magnum
- **Shape:** Ergonomically contoured
- **Use:** Drive and communication during the hunt

A hunting horn designed for large-scale hunts

When distances increase and communication becomes essential, the **ELLESS DIANE 45 Polished Hunting Horn** is ready. Thanks to its 45 cm bell, it promotes a wide and effective sound projection, allowing signals to be more easily perceived by participants spread across the territory.

Magnum nozzle: powerful and comfortable blowing

The Magnum mouthpiece provides a blowing experience appreciated by users seeking a clear and distinct sound signal. In practice, it facilitates the emission of a stable and consistent sound, particularly useful during group activities where every piece of information needs to be clearly conveyed.

Ergonomics adapted to the terrain

Its curved shape provides a natural and secure grip. Whether moving quickly or from a fixed position, this design allows for easy handling of the hunting horn. This is a detail that often makes all the difference during long days of **driven hunts** .

Polished finish and traditional style

With its glossy finish, this hunting horn retains the classic aesthetic of traditional hunting accessories. It integrates perfectly with equipment used for **hunting** with hounds, **driven hunts** , and other activities requiring clearly identifiable sound signals.

Additional features

- **Sound diffusion:** Optimized for wooded areas and open terrain
- **Grip:** Curved shape for easy and quick handling
- **Transport:** Ergonomic profile adapted for field travel
- **Maintenance:** Polished surface, easy to clean

An essential accessory for hunting communication

In a dense forest or along a wide hunting line, having a powerful sound signal provides a real advantage for organization. This horn allows for effective communication while perpetuating the customs and traditions that are an integral part of group hunting.

FAQ

What is the advantage of a Magnum tip?

The Magnum mouthpiece promotes comfortable blowing and allows for a powerful and clearly distinct sound signal in the field.

Is this hunting horn suitable for large-scale hunts?

Yes, its 45cm horn offers excellent sound dispersion, particularly suited to large hunting areas and wooded environments.

How to achieve a consistent and well-projected sound?

It is recommended to blow constantly in order to produce a stable, clear signal that is easily identifiable by other participants.
