A 40cm horn for powerful sound diffusion during hunts.

The **ELLESS DIANE 40 Polished Hunting Horn** is designed to ensure excellent sound propagation in the field. Its curved shape promotes a comfortable grip and quick use during group hunts.

- **Pavilion length:** 40 cm
- **Finish:** Polished
- **Tip:** Medium
- **Shape:** Ergonomically contoured
- **Use:** Drive and communication during the hunt

Enhanced sound diffusion for long distances

During a hunt, every signal counts. The **ELLESS DIANE 40 Polished Hunting Horn** features a 40 cm bell for excellent sound propagation. This design ensures signals can be heard over longer distances, a real advantage when participants are spread out over a large hunting area.

Ergonomics adapted to field situations

Its contoured shape allows for natural and quick handling. Its ease of grip is particularly appreciated when immediate communication is required. Whether at work or on the go, it remains simple to use and comfortable to wear.

A traditional and functional accessory

The polished finish highlights the authentic character of this hunting horn while making it easy to maintain. It naturally finds its place among enthusiasts of **driven hunts** , **hunting traditions** , and **venery** , where sound signals remain an effective and recognized means of communication.

Additional features

- **Sound range:** Optimized thanks to the large horn
- **Ease of use:** Curved shape for easy gripping
- **Recommended use:** Hunts and hunting gatherings
- **Maintenance:** Simple cleaning of the polished surface

A reliable ally for hunting days

In dense undergrowth or along a long hunting line, having a clear sound signal provides a real advantage for organization. This horn allows for the efficient transmission of essential information while perpetuating the traditional practices of group hunting.

FAQ

Why choose a horn with a 40 cm bell?

The large horn promotes better sound projection, allowing signals to be heard more easily over long distances.

Is this hunting horn suitable for hunting in the forest?

Yes, it was designed to offer effective sound diffusion, particularly useful in wooded environments where communication can be more complex.

What type of nozzle does this model come with?

This version is equipped with a medium nozzle, offering a good compromise between blowing comfort and sound signal control.
