A large-format hunting horn for powerful and well-carried sound signals.

The **ELLESS DIANE 30 Polished Hunting Horn** is designed to ensure excellent sound projection during hunting activities. Its curved shape offers a comfortable grip and appreciable responsiveness in the field.

- **Pavilion length:** 30 cm
- **Finish:** Polished
- **Tip:** Medium
- **Shape:** Ergonomically contoured
- **Use:** Drive and communication during the hunt

A sound range suitable for large-scale hunts

When it's necessary to quickly transmit information over a wide area, the **ELLESS DIANE 30 Polished Hunting Horn** emits clear and easily perceptible sound signals. Its 30 cm bell promotes efficient sound dispersion, particularly appreciated in wooded or hilly environments.

Ergonomics designed for action

Its curved design offers an excellent grip. In practice, this shape facilitates quick handling when moving around or changing positions. It's exactly the kind of accessory you keep close at hand to communicate effectively without interrupting the action.

A polished finish in a traditional style

The polished finish highlights the classic aesthetics of this hunting horn while simplifying its maintenance. It fits naturally into the equipment of enthusiasts of **driven hunts** , **hunting traditions** , and **venery** .

Additional features

- **Sound diffusion:** Optimized for open and wooded spaces
- **Grip:** Shape designed for quick handling
- **Transport:** Limited size despite its excellent sound range
- **Use:** Signals and communication between participants

FAQ

What is the advantage of a 30cm horn?

A longer horn generally promotes better sound diffusion, allowing signals to be heard more easily at a distance.

Is this hunting horn suitable for hunting in the forest?

Yes, it is particularly well-suited for driven hunts thanks to its good sound range and its ability to transmit audible signals in wooded environments.

How to get a consistent sound?

It is recommended to blow constantly in order to obtain a stable, clear and well-carried signal on the ground.
