Balls composite hooves Proud: arrow + mass hammer + hoof.

On the Fier Classic, the central arrow is made of brass and the lead hammer mass. It is suitable for all types of big game.

- Speed (OV) 445 m / s - Energy (E0) 2277 d
- Speed (V50) 301 m / s - Energy (E50) 1000 days
- Recoil energy (J) 24 d *
- Bourre Vouzelaud Felt

The bullet "FIER" is a projectile consisting of 4 parts:

- A brass arrow,
- A lead hammer mass in which is inserted the arrow,
- A 2-piece container that encloses the whole.

It flies in one piece and hangs the obstacle very well, it is a little less sensitive to ricochets. The central arrow and hammer mass are released only upon impact on the animal and penetrate deeply.

The qualities of the Fier projectile:

- High accuracy
- Double impact effect (deep penetration / strong expansion in soft zone)
- Excellent hooking and power penetration in the target, even if tangential shot from the front or back.
- High and regular speeds.
- Strong energy at impact
- Moderate pressure and passage without damage in chokes
- Very low risk ricochet
- High quality French encartouchage
- CIP compliant
