Geco softpoint bullet

- The legendary ball Geco softpoint is suitable in almost all hunting situations.
- It combines a reliable behavior in the body of the game and has a good ballistic efficiency. The thin wall of the ball linked to the malleable tip and a gradually increasing resistance make it possible to better control the deformation process even in the case of heavy game.

Geco plus bullet

- The new Geco plus bullet is a precise projectile designed using the latest technologies.
- The Geco bonding technique is characterized by the extremely strong solder between the core and the projectile shell. As a result, the Geco more mushroom with minimal fragmentation and have excellent penetration into the game, even heavy or touching the bone.
- Visible break points on the tip of the liner help control deformation and ensure bale efficiency .

Geco express bullet

- The Geco express ensures a tight trajectory, a high ball speed and a fast energy transfer, all in a new and unique geco design.
- The simplified form of ball combined with the new Geco Express tip allows a great accuracy of long range shooting without correction of the aiming point.

Geco tailmantel

- Very versatile,
- Fits most types of hunt
- Precision
- Speed
- Instant effect
- Penetration
- Venison preserved
