- **Available weights** : 135 gr / 8.8 g and 175 gr / 11.3 g
- **Initial speed** : 840 m/s (135 gr) - 810 m/s (175 gr)
- **Initial energy** : 3091 J (135 gr) - 3694 J (175 gr)
- **Packaging** : Box of 20 cartridges

Two weights for optimal efficiency when beating

The **Sauvestre FIP Battue** in .30-06 Springfield caliber is available in two configurations: 135 gr for fast and tense shots, and 175 gr for **reinforced penetration** on the most robust game. Both versions are based on the **Arrow Internal Scope** technology, a **lead-free bimetallic** design offering a **triple ballistic effect** : penetration, dilaceration and hydrodynamic cavitation.

Ballistic behavior

The 135g version prioritizes **speed and a flat trajectory** , ideal for dynamic shots when hunting deer or wild boar. The heavier 175g version maximizes **terminal efficiency** and penetration capacity, suitable for large deer. Both guarantee safe shots and optimal preservation of the venison.

Ballistic data

Measurements taken with a 610 mm barrel:
