It's a weapon you can rely on, whether you're hunting, stalking, or shooting long distances.

A fluted and threaded barrel ready for your accessories

The **fluted free-floating barrel** ensures lightness and stability, while allowing for regular groupings. Its **M14x1 thread** (or 5/8x24 for the .300 Win Mag) allows the addition of a sound moderator or a muzzle brake, considerably improving shooting comfort.

A stock designed for comfort

Its **black synthetic stock** is robust and weather-resistant. The **rubber buttplate** effectively absorbs recoil, making it a pleasant rifle to use even with powerful calibers. Its 36 cm length provides good ergonomics for most hunters.

Smooth and reliable mechanics

The **spiral bolt** facilitates quick and quiet reloads, while the **adjustable trigger pull** from 2 to 7 pounds allows the rifle to be adapted to the shooter's preferences. With its **detachable** 3+1 or 5+1 round magazine, it combines autonomy and practicality. The pre-installed **Weaver base** makes mounting an optic simple and quick. You can adjust the rifle's pull weight by separating the trigger block from the stock (to do this, remove the screws at the front and rear of the magazine well) and then turning the screw on the trigger block.

An ideal choice for big game
