High hunting socks in CLIMAYARN.

Merino wool and polypropylene for perfect thermoregulation, fast drying and optimal comfort.

CLIMAYARN hunting socks, Merino wool and polypropylene blend for perfect thermoregulation in all weathers, fast drying and comfort.

Friction Free system, fiber with a very low coefficient of friction. Prevents the formation of blisters.

- Stem comfort.
- Achilles heel protections.
- Heel and tip in Friction Free.
- Malleolus and arch tightenings.
- Comfort terry insole in Climayarn.
- Dimensional stability, resistance to use.
- Second skin effect, optimizes the hold on the foot.

TECHNICAL PARAMETERS:

Ergo'Technicity System

Precision and ergonomics for optimum control of your movements: 3D knitting to create a "shaped" heel / Reinforcement of the heel and toe areas / Non-compressive Soft Edge and adapted to all sizes / Perfect fit with fitted sizes.

Adaptive Ergonomic System

With the design of the sock, there are protective zones adapted to the morphology of the foot and the specific requirements of high-intensity sports. High heel reinforcement / Tip reinforcement / Tibia reinforcement / Lateral reinforcements / Ergonomics foot left-right foot.

Optimum Foot Fit

Tightening is integrated according to specific practices and conditions of use, mainly on the arch and malleolus, to gain precision during the effort.

3 Layer System

Knitting 3 layers: The central frame or "frame" of the sock is Polyamide to provide strength, dimensional stability and moisture transfer to the outside. The outer layer of thermoregulating fiber acts as a heat shield, protecting the foot from external elements. The inner loop layer creates a cushion that provides cushioning and comfort.

COMPOSITION:

- 38% Polypropylene
- 23% Wool
- 17% Polyamide
- 12% Polyester
- 10% Acrylic
