A compound bow designed for beginners

The **EK Archery Kirupira** allows you to experience the feel of a real **compound bow** in an accessible format. With a draw weight between **15 and 20 lbs** , it is particularly suited to young archers and those who want to take their first steps in archery with appropriate equipment.

65% let-off for easier aiming

The compound bow system offers one of the key advantages of a **compound bow** : once full draw is reached, the effort required to maintain the draw decreases. Here, the **65% let-off** makes the

aiming phase more comfortable. The archer can thus take more time to work on their positioning, alignment, and stroke without constantly bearing the full weight of the bow.

Compact size and easy handling

With a **34.5-inch** axle-to-axle length (approximately 87.6 cm) and a 6-inch brace height, this bow maintains easy-to-handle dimensions. Its CNC-machined riser offers a precise finish and a good foundation for gradually learning the fundamentals of **archery** .

A complete set of equipment to get started

The package includes more than just the bow. It also features a **rubber arrow rest** , a 1-pin sight, and a quiver that holds four arrows. A finger tab and an arm guard complete the set, two accessories that are especially useful during your first few sessions.

Two **26-inch fiberglass arrows** are also included. This set provides a comprehensive solution for learning how a compound bow works and for starting to work on posture, aiming, and stroke consistency.

A bow suitable for learning

With its moderate power and pulley system, the **Kirupira** is a natural choice for **introducing archery to the sport** . Its features allow for a gradual familiarization with the main elements found on a compound bow: arrow rest, sight, quiver, and pulley mechanism.

FAQ

Who is the EK Archery Kirupira arc aimed at?

With a draw weight of 15 to 20 lbs, the Kirupira is primarily intended for beginners and young archers wishing to discover how a compound bow works.

What accessories are included with the Kirupira?

The pack includes a rubber arrow rest, a 1-pin sight, a quiver for four arrows, a finger guard, an arm guard, and two 26-inch fiberglass arrows.

What is the purpose of the 65% let-off?

The let-off feature reduces the effort the archer must maintain once at full draw. With a let-off of 65%, holding the bow during the aiming phase becomes more comfortable than with a bow lacking this assistance.
