- **Trigger:** single selective trigger
- **Ejection:** extractor
- **Rocker:** Ergal with engraved silver finish
- **Stock:** sanded and oiled walnut wood
- **Weight:** 2.55 kg

A discreet rifle for regulating and hunting small game

The **Yildiz over-and-under silencer** in **.410 Magnum** caliber is designed for hunters who seek **quiet operation** without compromising accuracy. Thanks to its **carbon fiber sound moderator** , it significantly reduces the noise of the gunshot, especially with subsonic ammunition.

Integrated carbon sound moderator

Attached along the entire length of both barrels, the moderator effectively reduces the sound signature, making the weapon ideal for **pest control** or shooting near sensitive areas. The **carbon fiber** construction ensures lightness and strength.

83.5 cm long barrel with fixed chokes

The **over-and-under barrels** are choked 1/4 and 1/2 for optimal dispersion at medium range. Their length, including the moderator, provides good stability when firing and promotes complete combustion of the powder, even with low-velocity cartridges.

Ergal rocker and quality wood

The **Ergal receiver with** a silver finish is finely engraved with hunting motifs. The pistol grip and forend are **made of oiled, sanded walnut** , adding a touch of elegance while ensuring a natural

grip.

Shooting comfort and maneuverability

Despite the presence of the moderator, the shotgun weighs only **2.55 kg** , making it very maneuverable, even when hunting from a blind or on the move. The **selective single trigger** allows you to choose which barrel to fire, and the extractor ensures quick and easy operation.

FAQ

Is the sound moderator integrated into the rifle?

Yes, the carbon sound moderator is fixedly mounted along the length of both barrels.

Can standard ammunition be used with this rifle?

Yes, it works equally well with standard cartridges as with subsonic ones for maximum discretion.

Is this rifle suitable for regulation?

Yes, its low sound signature and small caliber make it an excellent choice for regulation in sensitive environments.
