A60177	Mosfet II	Vente libre	28.00 € incl. tax 23.80 € incl. tax

Device increases gun rate of fire and battery holds longer, than with basic wiring.

Professionally made mosfet designed for airsoft electric guns (AEG).

Specs :

- Very small device dimension, it fits nearly everywhere (device size 25x12x7mm)
- Devices without wires, you can use max. 1,5qmm (AWG16) power wires and 0,5qmm (AWG20) signal wires
- Designed for spring up to M210 (equivalent for current 150A single shot fire or 50A burst fire for max. 30s). For higher load please use Mosfet II
- Specified for common batteries up to 17V (Ni-xx 8.4 - 12V, lipol 7.4 - 14.8V)
- 5 wires connection
- Positive wire isn't connect into device
- No current consumption in the idle mode
- No sparking on switch contacts
- In auto fire mode piston stops in random position due the mechaibox design
- For right function is necessary to have a functional gearbox cut off lever, selector plate, reverse latch, trigger and trigger block, as it has the standard gearbox
