A faithful reproduction of the song thrush

The **Helen Baud Song Thrush Screw Call** has been specially designed to reproduce the typical vocalizations of the **song thrush** . Its screw mechanism generates natural and nuanced sounds that faithfully recall the calls of this iconic bird of woods, hedgerows and orchards.

Simple and efficient operation

The screw-type mechanism is valued for its ease of use and ability to produce consistent calls. A few simple movements are all it takes to obtain realistic calls. This simplicity allows both beginners and experienced users to fully utilize the call's capabilities.

Traditional hornbeam wood manufacturing

Made from hornbeam wood, this bird call boasts excellent acoustic quality. This naturally dense material contributes to producing warm and authentic sounds. The steel and copper metal components ensure the mechanism's strength and longevity.

Compact and easy to carry

Weighing only 20 grams and boasting a particularly compact design, this game call easily slips into a pocket, vest, or hunting bag. It remains readily accessible whenever conditions are favorable for its use.

A classic beloved by enthusiasts

Screw-type bird calls are among the most popular traditional models for hunters and birdwatchers. Their simple mechanical operation, robustness, and characteristic sound make them timeless accessories that retain their effectiveness in the field.

FAQ

What bird is this call imitating?

This bird call reproduces the characteristic song of the song thrush thanks to its traditional screw mechanism.

How does a screw-type decoy call work?

The sound is produced by the rotation or movement of the integrated screw, allowing vocalizations to be reproduced in a simple and progressive manner.

What are the advantages of hornbeam wood?

Hornbeam wood offers excellent acoustic resonance, good resistance to wear and contributes to the realism of the sounds produced.
