|---------|-----------------|-------------|--------------------|
| EN10300 | Level Right Pro | Vente libre | 145.00 € incl. tax |

### For a perfect and precise adjustment of the reticle of your riflescope.

The Level Right Pro change allows you to simply correct your reticle alignment in 4 easy steps. Accurate and intuitive, this instrument saves time by quickly aligning the actual reticle of the scope with the horizontal plane of the barrel (regardless of the turret alignment), which is essential to the long-range accuracy of your rifle.

Level-Right Pro helps you quickly and confidently mount a scope for maximum accuracy. Specifically designed for bolt-action and lever-action rifles, or rifles with a Picatinny forearm.

A level reticle is essential for long range accuracy. For longer shots, an angled (or not) reticle will pull or repel the trajectory of the bullets out of the vertical center.

A level scope means that the reticle will be perfectly aligned with the barrel of the rifle. The turret of most scopes is not perfectly aligned with the reticle, so even if your turret is at barrel level, your scope may not be.
