Tactical scope for long distance shooting (TLD) with 1/20 MRAD correction !!!

The Falke 8.5-25x50 scope is designed for very high precision, in particular thanks to its 1/20 MRAD impact correction much finer than that of the majority of scopes on the market.

- 30mm scope body
- Lockable Tactical Turrets
- Parallax adjustment from 10m to infinity
- Impact correction per click 1/20 of MRAD (5 mm at 100 m)
- Diopter adjustment
- Half Mildot reticle with illuminated red dot in the second focal plane (SFP)

Ideal for snipers looking to target a target at medium to long range.

Of very robust and reliable German design, FALKE optics resist the strongest calibers, without becoming out of adjustment.

FLAKE optics bring both lightness and rigidity with their aeronautical alloy design.

The illuminated Half Mildot reticle allows shooting corrections directly to the reticle, without having to modify the position of the turrets.
