Dreadful accuracy for an unbeatable price in an ultra short configuration

The PCP MX7S air rifle (for Short) is a bullpup type air rifle with a synthetic high density polymer stock. Despite its extremely compact size, this PCP rifle offers a 450mm barrel.

2 pressure gauges are present on the rifle in order to precisely follow the air pressure present in the 275 cc tank (200 bars maximum) and the pressure contained in the regulator. The latter ensures shots at constant pressure, which has the effect of greatly improving the regularity of shots, and therefore precision.

- Caliber 5.5mm / Cal .22 air
- DIN filling pin compatible with PCP A73411 pumps
- 1/8 NTP DIN adapter included
- Rifle delivered in a hard case in the colors of the brand
- 2 12-shot magazines included
- 1 set of O-rings for all leaks included
- 1/2 x 20 UNF male thread for silencer
- Picatinny mounting rail (21mm) for scope or red dot
- Comfort rubber butt plate
- Step by step
- Autonomy: 60 shots with 1 air recharge (approximately)

Scope not included.
