The Winchester semi-automatic rifle for driven hunting!

Designed for demanding hunters, the **Winchester SXR² Field semi-automatic rifle**

Winchester is renewing its range with the **SXR² Composite**, an evolution of the SXR Vulcan after more than 13 years of impeccable service.

Robust and proven mechanics

Its **adjustable gas borrowing system** ensures a reliable firing cycle, even with **subsonic ammunition** or when using heavy accessories. The **7-lug rotary bolt** provides a secure and consistent locking.

FN Herstal precision and reliability barrel

Its **53 cm barrel**, manufactured in Belgium by FN Herstal and CIP tested, guarantees robustness and precision on all calibers: **.308 Win**, **.30-06 Sprg.**, **.300 Win Mag** and **9.3x62**.

Synthetic stock: all-terrain resistance and comfort

Its redesigned **composite stock** features a **straighter grip**, an ambidextrous palm swell, and modern checkering for a reliable and secure grip in all weather conditions. The **Inflex II buttplate** absorbs recoil for a more comfortable shot. Custom fit with the included spacers.

Adjustable ergonomics and perfect grip

The stock can be adjusted:

- +/- 3.5 mm in height
- +/- 3 mm drift
- Standard length: 360 mm, expandable with 7 mm spacer or optional butt plate (25 mm or 30 mm)

Functional controls and increased safety

The **streamlined handguard** reduces its width by 10% for a better grip. The **enlarged cocking lever** facilitates handling even with gloves, and the **slide stop** provides increased safety when loading or unloading.

Fast aiming and total modularity

Adjustable sights with ultra-bright LPA fiber optics ensure fast target acquisition. Compatible with existing SXR mounts, the SXR² Composite features integrated rings and Nomad rails for custom optics mounting.

Full technical specifications

- Action: Semi-automatic with adjustable gas action
- 7-lug rotary lock
- Barrel: 53 cm, FN Herstal, CIP tested
- Calibers: .308 Win / .30-06 Sprg. / .300 Win Mag / 9.3x62
