- **Hop-up:** Fixed
- **Sights:** Combat type with white dots
- **Picatinny rail:** Integrated under the barrel
- **Length:** 23 cm
- **Height:** 14.5 cm

A replica designed for realism

Inspired by the famous 1911, this replica from **Lancer Tactical** stands out with its full metal finish, **blowback mechanism** with a moving slide, and **non-slip grip** that ensures a firm hold, even under stress. The slide remains open when the magazine is empty-a detail appreciated by experienced players.

CO2 operation: autonomy and responsiveness

Powered by a **12g CO2 cartridge** inserted in the magazine, the replica delivers a stable power of around **360 FPS** , ideal for outdoor shooting or at hard targets. The **double-action** trigger system

allows firing without re-cocking the slide, optimizing responsiveness during gameplay.

Integrated tactical equipment

The lower Picatinny rail allows for the quick addition of a **laser** or **tactical light** , adapting the replica to any situation. The **three white dot sights** facilitate rapid target acquisition, even in low light.

Dimensions and finish

Measuring 23 cm long and 14.5 cm high, this replica makes a strong impression with its weight and construction. The **metal chassis** provides an authentic feel in the hand, enhanced by the **cocking serrations** and the lanyard ring at the base of the stock-a practical detail for securing the replica during gameplay.

FAQ

Is this replica compatible with magazines from other brands?

No, this replica uses a proprietary 15-round strip-mag type magazine designed for the LTX-50 model.

Can this replica be used in CQB?

With a power output of 1.5 joules, it is best suited for outdoor use. For CQB, a less powerful model is recommended.

What maintenance is required for this CO2 replica?

Regular lubrication of the seals and cleaning of the barrel after each session are sufficient to maintain performance.
