The new Black Fire Nordic Line attractant range has been developed from salt to which an apple or corn aroma has been added.

The **Black Fire Nordic Line** is a range of powdered attractants based on salt and enriched with fruit flavors. Packaged in 6 x 0.5 kg bottles, it can be used year-round, alone or mixed with bait.

- **Packaging:** 6 bottles of 0.5 kg
- **Available flavors:** Plum, Chestnut, Corn
- **Type:** Flavored salt-based powder
- **Use:** All seasons, all weather conditions
- **Target species:** Wild boar, roe deer, red deer, mouflon

A versatile fruity salt-based attractant

Designed for **feeding areas** , **blinds** , or **natural pools** , this flavored mix provides lasting attraction for animals. Simply sprinkle it on the ground or a tree trunk, or mix it with **corn** or your **usual bait** .

Three natural fragrances adapted to each season

The **aromas of plum, chestnut, and corn** are chosen according to their seasonal appeal. Their ripe fruit scent arouses strong curiosity and triggers territorial marking by animals, increasing the chances of repeated visits to the treated area.

- **Plum:** ideal in late summer and early autumn
- **Chestnut:** very attractive in autumn and winter
- **Corn:** effective all year round, especially during feeding periods

Formula tested by European professionals

Developed with the help of expert hunters and **Black Fire ambassadors** , this product has been validated in **areas with high hunting pressure** . Its formula combines **sodium chloride** and **natural flavorings** , also contributing to the supply of essential minerals for game.

Simple and adaptable to use

You can sprinkle the powder on the ground, add it to an automatic feeder, or combine it with a **salt block** . In the rain, the aroma is gradually released, creating a persistent and highly attractive scent trail.

FAQ

Can the Black Fire Nordic Line be used all year round?

Yes, its formulation allows for effective use in all weather conditions and in all seasons.

What game animals are attracted to this range?

The product is particularly attractive to wild boars, roe deer, red deer and mouflon.

How to apply the attractant effectively?

It can be mixed with your bait, sprinkled on the ground or used on a tree trunk for slow diffusion.
