The best STALON sound suppressor for stalking with its 31 dB sound reduction.

A sound suppressor with a slim and elegant design intended for hunting.

- Excellent sound reduction of 31 dB (in .308 caliber)
- diameter of 49 mm, length of 270 mm and weight of 370 g.

max cal. .223 = .22-250, .22 hornet, .222, .223

max cal. 6.5mm=6mm, .243, 6.5CD, 6.5x55

Cal. Max 308 = 270 Win, 7x57, 7x64, 7mm RM, 7.62x51, 308 Win, 300 WM, 30-06 Spr

Cal. Max 375 = 7.92x57, 338WM, 9.3x62, 375 H&H

The top of the range of silencers developed for hunting rifles.

- Machined from matte black anodized aircraft aluminum alloy
- Stainless steel baffle and thread
- Barrel cover system with rear gas decompression chamber
- Significant recoil reduction
- Exceptional durability
- Front part of the interchangeable silencer to be able to adapt to several calibers
- Low protrusion of the sound reducer at the front of the barrel (108mm)
- Maximum barrel diameter: 22.5 mm

An elegant silencer with impeccable finishes.

Its telescopic design with covering of the barrel, allows a distribution of the masses offering a rigidity of the whole and prevents any deformation of the barrel which can bend under the weight of the silencer.

This allows you to maintain incredible precision, while practicing shots with absolute discretion.

The strong point of STALON silencers is the right balance between acoustic performance, weight, ease of assembly and size.

Equip yourself with the best silencer for hunting, especially for stalking or lying hunters.

The STALON XE108 takes the already incredible performance of the X108, to improve it even more.

In order to measure the sound attenuation capacity of their silencers, STALON used a strict military protocol, MIL-STD-1474D. This protocol is used in military equipment and makes it possible to accurately and non-erroneously measure the capacity of a sound moderator for assault rifles and weapons of war.

Find the detailed protocol in detail by [clicking here](#).
