A discreet attractant invisible to the human eye, in the form of a boilie.

An ultra-premium game bait to attract wild boar.

- Available with anise, chocolate or fish scent
- Developed to blend into nature
- Very appetizing smell, attracting wild boar

The products finely developed by BLACK FIRE position them as one of the market leaders with their particularly effective attractants.

The aromas and scents used have been used in the hunting industry for decades, and are recognized for their effectiveness.

The invisible BLACK FIRE, in the form of boilies, are strong and durable, for a persistent odor despite the climatic conditions.

They are packaged in a resealable bag for long-term storage and an efficiency that is still as important despite the time spent.

BLACK FIRE INVISIBLE uses 3 different scents:

- L'Anis: The wild boars cannot resist it. Its strong smell drives them crazy.
- Chocolate: Wild boars love chocolate. Hunters have used it for over 50 years.
- Fish: Historically, fish is used to attract wild boar. Its strong smell makes it particularly effective.

For the BLACK FIRE Invisible to be effective, it is necessary to spread a handful of boilies on a place of passage and frequentation of wild boars.
