Total length: 36.2 cm

Weight: 2.76 kg

Sight Unit: Fixed Hanger & Adjustable Handlebar

Materials: Steel & Polymer

Finish: Black

Barrel threading: 1/2 "x 28

The PAK-9 is made from high quality steel with an exceptional fit and finish and also features an interchangeable Glock magazine adapter (sold separately) that allows the use of Glock chargers.

The PAK-9 is equipped with 4 Picatinny rails: a rail on the top for optical fixation, 2 lateral Picatinny rails on the front of the weapon for lamps or laser and a rail in front of the bridge arch for fixing front handle.

The PAK-9 with its gun-type look benefits from the incredibly resistant mechanics imagined by Michail Kalaschnikov for his famous AK47 assault rifle and then for the AK74. The Chiappa PAK-9 uses the 9x19mm semi-automatic pistol ammunition instead of the original AK47 7.62x39, which makes it a particularly compact and easy-to-handle pistol.
