Controlled penetration and maximum expansion on medium to large game.**Geco softpoint bullet**

- The legendary Geco softpoint bullet is suitable for almost any hunting situation.
- It combines reliable behavior in the game body and has good ballistic efficiency. The thin wall of the bullet combined with the malleable tip and a gradually increasing resistance make it possible to better control the process of deformation even in the case of heavy game.

Geco plus bullet

- The new Geco plus bullet is an accurate projectile designed using the latest technologies.
- The Geco bonding technique is characterized by the extremely strong solder between the core and the shell of the projectile. As a result, the Geco plus mushrooms with minimum fragmentation and have excellent penetration in even heavy game or when hitting bone.
- Visible breaking points on the tip of the shell help control deformation and ensure bullet efficiency.

Geco express bullet

- The Geco express provides a tight trajectory, high ball speed and fast energy transfer, all in a new and unique geco design.
- The simplified bullet shape combined with the new Geco express tip allows high precision shooting at long distances without aiming point correction.

Geco tailmantel

- Very versatile,
- Fits most types of hunting
- Precision
- Speed
- Instant effect
- Penetration

- preserved venison

Geco Star

- lead-free expanding warhead
- guaranteed expansion at all shooting distances
- high clean precision and good venison preservation
- maximum wounding power in the depth of the game body and shorter escape distance thanks to the GECO COPPER CORE warhead

Ideal ammunition for driven hunts or stalking

The GECO STAR in .308 Win. is optimized for shooting medium to heavy game, such as wild boar or deer. Its lead-free **monolithic** structure offers **controlled expansion** while maintaining **deep penetration**, making it a formidable ammunition against robust animals.

Thanks to its **ballistic coefficient of 0.388**, the bullet maintains excellent stability over common hunting distances. It guarantees a taut trajectory and reliable deformation, even after bone impact.

Speed in m/s

- **V0:** 783
- **V50:** 746
- **V100:** 709
- **V150:** 673
- **V200:** 638
- **V250:** 605
- **V300:** 573

Energy in joules

- **E0:** 3280 J
- **E50:** 2977 J
- **E100:** 2689 J
- **E150:** 2423 J
- **E200:** 2178 J
- **E250:** 1958 J
- **E300:** 1757 J

Compliant with lead-free zones, this ammunition is ideal for hunting in forests and from a stalking position in open terrain.
