- Fast-focus type adjustable diopter
- Zerotable Tactical Turrets with Zero Stop
- Magnification Ring with Throw Lever
- Multi-coated HD lens with a light transmission rate of 99.5%
- Supplied with Flip-Up protective windscreen

The RITON 5 CONQUER scope has been specially developed for the TLD. With its high level of manufacture and quality, this scope allows you to approach all shooting distances with precision and sighting comfort.

Recognized by shooters in the USA for their high accuracy, RITON optics deliver incredible image resolution even at the highest magnification. Its lens quality allows high light transmission, for precise shots even in low light.

Enjoy crisp resolution with no edge distortion or chromatic aberration.

Its zerotable graduated turrets equipped with a high-level "return to zero" (RTZ) allow for dazzling shooting corrections, with a rapid return to the original settings. A clear advantage for shooters practicing the PRS discipline (Precision Rifle Series)

RITON glasses were developed by shooters, former soldiers, and former members of US law enforcement. This generates a great requirement as well as an important control in the manufacture with selected materials of high quality.
