OP876	Canardouze special assembly	Vente libre	37.1	2.4	595	Special	262.00 € incl. tax

Extremely low pivoting recoil shock mount for Gabion hunting.

Assembly intended to mount a gabion telescope on a Canardouze rifle. This assembly makes it possible to compensate for the particularly significant recoil of the simultaneous firing of the 2 guns. The hunter's eye is protected because the scope does not follow the movement of the weapon.

- Pivoting mechanism for rapid disassembly and reassembly of the bezel without loss of adjustment. Articulation with play adjustable by tightening screw.
- Quick locking by pivoting lever.
- Fixed part fixed on the rifle by 3 screws. Assembly to be carried out by a gunsmith.
- Damping by 2 springs mounted on 2 steel guide rods.
- Anti-recoil spring tension adjustable by moving the stops.
- Support rod in aluminum alloy (l. 11 mm), base and mechanism in steel (l. 35 mm).

The Delory-Brumard recoil compensator assembly for canardouze allows the attachment of an 8x56 to 9x63 Gabion telescope or an equivalent 1/2 binocular.
