- Compatible with all COMMERCIAL type stocks
- Machined from reinforced polymer that is lighter and more durable than aluminum
- Supplied with the necessary screws

The DLG TACTICAL stock tube has been developed to fit on the pump-action shotgun grips of the same brand.

With its telescopic system, it allows the mounting of a stock whose length can be adapted to each shooter's morphology, including giving the weapon a tactical look.

The assembly of the butt tube is possible by all and does not require any modification of the weapon.
