For wild boar, deer and roe deer!

The Secret Spray has been designed for use in conjunction with the other attractants in the Black Fire range, to further enhance the olfactory faculties.

Can also be used alone on your land, to improve your chances of capturing an animal on your camera traps. One of the uses recommended by the manufacturer is to apply it to your boot soles before an outing, to increase the attractive potential of your watch area.

Please note, however, that this spray can only attract game, not create it: it is mandatory to use it in a game-rich area.
