Simple and practical night vision for hunting or observing at night!

The Pixfra M40 allows you to observe animals or humans in complete darkness because they emit body heat which makes them stand out from their environment.

3 models (detailed technical characteristics in PDF at the bottom of the page)

- M40 - 13 mm lens - 24° angle equivalent to a 2x zoom - Max distance: 382 m
- M40 - 19 mm lens - Angle 20.4° equivalent to a 2.5x zoom - Max distance: 558 m
- M40 - 25 mm lens - Angle 15.5° equivalent to a 3x zoom - Max distance: 735 m

Pixfra M40 thermal vision monoculars have many functions:

- HD image thanks to its 400x300 pixel 17µm sensor - Image: 1280 x 960 pixel
- Range: detection up to 735 m!
- 4 display modes depending on the situation: Iron red, Hot black, hot white, Alarm
- Fire detection: fire marker of 2mx2m at 1 km distance
- Rangefinder function: measures the distance of the target based on its size on the screen (4 modes)
- Direct WiFi transmission of images to your smartphone using the *Pixfra Outdoor*
- Internally: slot for an SD card up to 256 GB for photos and videos, micro USB and CVBS connectivity.
- Long-lasting battery: up to 9 hours of battery life. Automatic standby if the device is not used.
- Integrated laser to designate targets.
- Resistant: 2m drop, IP67 waterproofing
- Standard 1/4" photo stand nut, cover and strap supplied.

WARNING: DO NOT DIRECT IT TOWARDS THE SUN AS THIS WILL BURN THE SENSOR INSTANTLY!

Thermal vision goggles are available over the counter. It is the ideal observation accessory for the hunter, the nature enthusiast, the hiker.

The Pixfra M40 thermal monocular is a simple and practical tool for observing game at night.

Its small footprint makes it easy to carry in your bag. It will follow you everywhere during your night outings.
