Ultra light and waterproof shoe!

Ultralight and robust at the same time, this shoe is suitable for daily to intensive use. Waterproof and breathable, it offers great comfort thanks to its MTD membrane.

Designed for work, these shoes will accompany you on a daily basis.

- Strong and durable front stone guard
- Comfortable sole
- Waterproof and breathable membrane
- BAT technology.

Waterproofing:

These shoes will keep you dry thanks to its waterproof membrane and taped seams. For the tests, they were immersed in a basin of water for 1h30 before checking that the interior had remained dry. The material has a fairly fine mesh to block the entry of water while allowing perspiration to escape, for optimal comfort.

Anti-tearing:

These shoes have been made with a ripstop material, which means that the warp and weft threads present in its structure are designed to ensure its resistance and prevent any tearing. A model that will stand the test of time!

Light

The EVA (Ethyl Vinyl Acetal) used for this sole is an ultra light and very comfortable material. It offers an excellent level of cushioning, flexibility and remains effective over time.
