A particularly comprehensive book on reloading! Volume 2

After the success of No. 1, discover No. 2!
Here is today the result of a little more than 2 years of work: "T.2 reloading: cartridges, powders, presses, stands, sights"
Authors: Jean-Pierre Beurtheret and Freddy Drubigny

"Le Rechargement" published in 2017 could leave readers with an unfinished taste. With such a subject, many things were still to be written!
This work follows two axes:
- The enrichment of subjects covered in T.1: primers, presses, powder, tools, ballistics, layout of stands and operation of auto and semi-auto weapons.
- The addition of new themes: the transformation and maintenance of weapons, the description and operation of sighting instruments (open sights, optical, electronic), muzzle brakes, flash hiders, sound moderators, military projectiles, sound trauma as well as a bit of history with the birth of a legend: Creedmor 1874.
Always available: T.1 reloading: Components, tools, procedures, ballistics
