### A lever-action hunting rifle in the mythical 30-30 caliber!

A superb rifle for hunting big game and more specifically wild boars.

Compact and easy to control rifle thanks to the reduced barrel length, the microcell butt plate and the adjustable cheek piece. CNC machined case.

Solidity and easy handling, typical of guarded lever models. The ballistic precision and stopping power of the patented PMG rifled barrel in 30-30 Winchester caliber make this rifle ideal for European and American big game hunting.

- Synthetic adjustable stock with pistol grip and adjustable cheekpiece.
- 483 mm barrel with 6 rifling at a pitch of 305 mm (1:12")
- Threaded barrel for mounting a sound moderator or muzzle brake.
- Adjustable rear sight and dovetail fiber optic front sight.
- Capacity: 5+1 shots.

Finally available in the .30-30 Winchester caliber, from a glorious past and still the reference caliber in the USA, the Pedersoli Droptine rifle meets a real expectation of driven hunters.

This model is characterized by innovative components and materials, as well as an affordable price.

Davide Persoli is proud to include this famous caliber in the Boarbuster range.

The PMG barrel, threaded 5/8"x24UNF at the muzzle is equipped with a fiber optic front sight and the Picatinny base with integrated front sight.

After much research and development, Pedersoli has designed a special loading lever that is both ergonomic and large enough to facilitate loading while wearing protective gloves or comfortable enough with bare hands.

Equipped with a Microcell stock pad for higher recoil absorption than the typical rubber pad, the innovative techno-polymer stock has vertical and horizontal adjustments.
