Ergonomic CO2 blowback replica licensed by Steyr, ideal for CQB.

The **ASG Steyr L9-A2 CO2 airsoft pistol** is a modern and tactical replica licensed by **Steyr Arms**, featuring an aggressive design, a metal blowback slide, a Picatinny rail and an ergonomic textured grip.

- **Energy:** 0.81 Joules
- **Propulsion:** CO2 or gas
- **Caliber:** 6 mm
- **Capacity:** 22 marbles
- **Hop-up:** adjustable
- **Slide:** metal / **frame:** polymer
- **Rail:** Integrated Picatinny
- **Weight:** 850 g
- **Barrel length:** 103 mm
- **Speed:** 90 m/s (? 295 fps)

A design conceived for demanding shooters

The **Steyr L9-A2** impresses with its sleek silhouette and firm grip. The **overmolded grip**, textured side panels, and interchangeable stock backstrap enhance handling. The integrated **Picatinny rail** allows for the addition of a light or laser, perfect for CQB sessions.

Efficient and smooth to use

The **CO2 or gas blowback** system ensures a satisfying recoil with every shot, while the **adjustable hop-up** allows you to optimize accuracy depending on the BB used. Its moderate power of 0.81 J makes it suitable for most indoor and outdoor fields.

A licensed replica, designed to last

Featuring a **metal slide** and a **reinforced polymer body**, the L9-A2 combines robustness and lightness. Its dual-fuel mechanism accepts both gas and CO2 magazines. The trapezoidal sights ensure rapid target acquisition, even in challenging conditions.

Secondary characteristics

- **Type:** Semi-automatic blowback pistol
- **Function:** double action, moving bolt
- **Rail:** Standard Picatinny
- **Sight:** fixed trapezoidal
- **Compatibility:** gas / CO2 (dual source)

FAQ

Is this replica compatible with CO2 and gas?

Yes, the L9-A2 is a "dual source" replica compatible with both types of power depending on the charger used.

Can the L9-A2 be used in CQB?

Yes, its power of 0.81 joules and its manageable size make it an excellent option for indoor courts.

Is the hop-up easily adjustable?

Yes, the replica is equipped with an adjustable hop-up allowing the firing curve to be adapted according to the BB.
