Intended for an expert public, these highly technical boots are suitable for regular use, both in the garden and in the forest.

Handmade in France, this iconic boot is practical and comfortable. It is easy to put on and take off and its shock-absorbing rubber sole.

Our boots are composed of:

- Majority natural rubber: resistance and flexibility
- Self-cleaning notched sole: grip and grip
- Softex® lining: washable with a sponge and quick drying

Self-cleaning serration

The design of the sole pad is not trivial. On this model, it has been specifically designed to evacuate soil and stones naturally, as you walk.

Total sealing

The boot is made of natural rubber to ensure total waterproofing. Not a pair slips through the cracks: the waterproofness of each pair of boots manufactured is tested! The boot is filled with air and then submerged in water. If no bubble appears, it fulfills its functions and can now accompany you.

- Upper: Majority natural rubber.
- Lining: 100% polyamide.
- Outsole: Rubber.

Eagle for tomorrow

Made from natural rubber
