Intended for an expert public, these boots are suitable for regular use, especially in the forest.

Handmade in France, the Aigentine rain boot asserts its character with its tightening strap and notched sole. Its cavalier cut and curved shape give it a feminine look.

Our boots are composed of:

- Majority natural rubber: resistance, insulation and flexibility
- Self-cleaning notched sole: grip and grip
- Softex ® lining: washable with a sponge and quick drying

Total sealing

The boot is made of natural rubber to ensure total waterproofing. Not a pair slips through the cracks: the waterproofness of each pair of boots manufactured is tested! The boot is filled with air and then submerged in water. If no bubble appears, it fulfills its functions and can now accompany you.

Very adherent

The compound of the sole is designed to offer optimal grip and increased longevity of the sole: ideal for slippery surfaces and soft ground.

Self-cleaning serration

The design of the sole pad is not trivial. On this model, it has been specifically designed to evacuate soil and stones naturally, as you walk.

Insulating

These boots are ideal for winter: they have a technical lining made of neoprene foam that retains heat and insulates from the cold down to -20 degrees.

Composition:

- Upper: Majority natural rubber
- Lining: Neoprene
- Insole: Neoprene
- Outsole: Rubber.
