SKU	Designation	French Law	Weight (g)	Battery	MSRP
A53255	Garrett ACE 400i	Vente libre	1320	LR6 - AA	609.00 € incl. tax

The most efficient metal detector in the Garrett Ace range! Used by professionals and passionate amateur detectorists alike.

A detection maestro at a great price. The ACE 300i has more modes than an ACE 200i and improved features to help find more treasures.

- Graphic & digital identification
- Target depth display
- Sensitivity adjustable to 8 levels
- Iron discrimination: 4 levels
- Distinction by adjustable range.
- 5 search modes plus location.
- Length adjustable from 1 m to 1.35 m
- Frequency: 8 kHz - adjustable
- Original disc: PROformance DD concentric 18 x 25 cm
- 6.35mm headphone jack
- Audible identification indicator: 3 tones.
- Battery life: 40 hours
- Batteries: 4 x AA 1.5 volts included with wear indicator.
- Delivered with an Easy Stow helmet, a cover for the detector and a disc protector.
- 2-year limited warranty: parts and labor.

The Garrett ACE 400i detector represents a significant evolution of one of the world's most popular metal detectors, the Garrett EURO ACE (called ACE 350 in the United States).

This is the top of the range model in the all-new Garrett ACE i metal detector series, which expands the existing range of Garrett ACE detectors.

The Garrett ACE 400i represents a major evolution of the already popular Garrett EURO ACE, which was renowned for its detection performance and affordable price. The detector already has

the essential features needed to get started with metal detecting: it is affordable, easy to use, and offers advanced features such as pinpointing, which allows you to precisely locate the target in the detection area.

The Garrett ACE 400i is an exceptional option for those who want to get into metal detecting at an affordable price while still benefiting from the adjustments and features of a high-end detector.

This detector has visual discrimination thanks to its large LCD screen and the NOTCH function, as well as audio discrimination via its multitonality. Depending on the conductivity of the target, it will emit high tones for highly conductive targets, medium tones for medium conductivity targets, and low tones for ferrous targets.

The Garrett ACE 400i offers five pre-programmed detection modes to simplify the detection learning process:

"Zero-disc" mode: for detection of all metals.
"Jewelry" mode: recommended for jewelry detection, but adaptable to other types of targets.
"Custom" mode: allows personalization of discrimination settings.
"Relics" mode: intended for the detection of iron relics with low discrimination.
"Coins" mode: specially designed to detect coins.

Garrett's ACE range has been improved based on user feedback. The Garrett ACE 400i has several new features compared to the EURO ACE:

- Indication of the target conductivity, allowing the user to identify the probable nature of the target using a number from 1 to 100 (100 indicating the most conductive target).
- New clamping rings on the rod to prevent unwanted movement over time.
- Iron Audio function, similar to the high-end Garrett AT Pro model, to distinguish discriminated irons and recognize targets of different quality with similar conductivity.
- Increased detection frequency of 10 kHz, providing better detection depth performance.
- Switching detection frequency to avoid interference with other prospectors.

The Garrett ACE 400i comes with a 22 x 28 cm DD protector, Garrett Clear Sound headphones and a rain cover for the case. With its improved performance and advanced features, the Garrett ACE 400i is one of the best choices for passionate detectorists.

Technical characteristics of the Garrett ACE 400i:

- Pinpointing function for precise target location.
- Multi-tone detection with 3 distinct tones.
- Double D detection disc (DD) measuring 22 x 28 cm.
- Weight: 1.3 kg.
- Power supply: 4 LR6 batteries.
- Autonomy: Up to 40 hours of detection.
- 2 years warranty.

Package contents include:

- Garrett Clear Sound headphones.
- DD disc protector measuring 22 x 28 cm.
- Garrett protective cover for the case in case of rain.
