Special hunting cartridges for wetlands

Box of 25 Ferro-Zinc pellet cartridges (lead-free) specially designed for hunting in wetlands. Shot No. 2 corresponds to a No. 4 pellet and shot No. 7 to a No. 9 pellet. **Only for steel pellet-tested shotguns (Fleur de Lys stamp on the barrel).**

The lower density of steel/iron (30% less than lead) requires a higher muzzle velocity. To maintain the same final energy, increase the size of the lead pellets by two numbers (A No. 4 steel cartridge corresponds to a No. 6 lead cartridge). High Pressure cartridges must only be used with weapons tested for steel pellets (presence of the Fleur de Lys stamp on the barrel of the weapon) and it is recommended not to exceed the choke 1/2 when firing these ammunition.
