Special hunting cartridges for wetlands

Box of 25 steel ball cartridges specially designed for hunting in wet areas. Mixture of balls 1 and 3. **Only for proven rifles with steel balls (Fleur de Lys hallmark on the barrel).**

The lower density of steel (30% less than lead) requires a higher muzzle velocity. To maintain the same final energy, increase the size of the lead balls by two numbers (A No. 4 steel cartridge corresponds to a No. 6 lead cartridge). High Pressure cartridges must only be used with proven weapons with steel balls (presence of the Fleur de Lys hallmark on the barrel of the weapon) and it is recommended not to exceed the 1/2 choke to fire this ammunition.
