### Shoot, throw, win!

A simulation/training grenade made primarily from paper pulp in the form of a Pineapple style grenade. The casing is durable and does not crush easily, and when it explodes, the fragmentation is harmless. It is equipped with EG's Wire Pull® igniter and the explosion disperses the clay pellets in all directions within a radius of approximately 5 meters. An Airsoft favorite worldwide.

- 4 to 6 second delay
- Sound intensity: 120 db max
- Distributes the balls up to 5 meters around the explosion
- Pomegranate pineapple format
- Scraper Trigger System
