(x1) STD Gas VMP Black charger - VGS-30-01
(x1) Color Matched Magazine Sleeve
(x1) Replacement O-rings
(x1) Manual
(x1) Exploded diagram of parts
(x1) VORSK PVC Patch

The VORSK VMP-1 is a lightweight, all-polymer, gas-operated Airsoft submachine gun ideal for CQB terrain

VORSK's mission is to provide Gas-Blow-Back excellence to the Airsoft field. Building on their extensive selection of gas powered handguns, the VMP-1 is their first foray into the world of submachine guns. Announced at IWA 2023 and shipping to stores this summer, the VMP has attracted a lot of attention due to its compact and lightweight design, features and, of course, excellent GBB performance.

Ergonomic, Compact & Lightweight

Constructed from a durable, lightweight polymer, the VMP-1 is the number 1 asset in CQB environments.

The pistol grip features molded dots for a secure hold. The green fiber sights are neatly stored in the flat 20mm accessory rail. Although it is difficult to get your line of sight behind when used with the stock, fiber light sights allow for fast, instinctive parallax aiming for rapid target acquisition. The VMP-1 is so light and compact that you can play it in "Akimbo".

The perfect Back-up

Built for CQB terrain, the VMP-1 can adapt to all types of terrain. Light and compact, it can become a Back up of choice, particularly for sniper/DMR players. Perfectly suited for close combat, these performances allow it to adapt to all types of terrain. Indeed, the VMP-1 is capable of hitting targets over 30 meters away with precision and a stable flight path. Its exceptionally high rate of fire.

48R Full-Auto Gas-Blow-Back Fun

The VMP-1 is an Airsoft submachine gun with different firing modes. The firing controls are all within easy reach with the bolt release, magazine release and fire selector just a finger or thumb away from your standard "on the trigger" position. The safety is controlled by a trigger safety that requires you to intentionally pull the full trigger before allowing the VMP to fire. Gas powered, VORSK recommends its own GBB Fuel, V6 and V8 variants for the VMP-1, with any premium Airsoft Gas suitable. You can expect to get at least two (potentially three) chargers for each gas refill. Additional chargers are available separately, remember to purchase your color matched charger covers to complete the look. To adjust the hop-up, the VMP-1 is supplied with an adjustment wrench.

Designed for accessories

You will rarely see a naked VMP-1 on airsoft fields. With a picatinny rail on top, an underbarrel rail, dual-slot side rails, an M4 stock slot and of course the optional "Can" suppressor, the VMP-1. Recommended aftermarket accessories include Foregrip, Lasers/Torches, Optical Riser + RDS/Holo Sight. Barrel attachments are limited when the supplied Flash Hider is installed as it was designed specifically for the "oversized" suppressor supplied with the "X" variant (also available separately). If you would like to install your own Flash Hiders, Suppressors or Tracer Units, simply remove the Flash Hider via its grub screws and replace it with any 14mm CCW airsoft gun accessory.
