Its polyurethane pads ensure optimal comfort for its wearer.

The Singer Safety Shelly100P hearing protection headset provides effective passive protection (no electronic system) thanks to its polyurethane cushions which perfectly surround the ear. Additionally, thanks to the ultra-soft material of the pads, the Shelly100P guarantees you optimal comfort during long-term wear. It will be ideal equipment for mowing your garden, carrying out construction work or for protecting your ears from the detonation of a firearm at the shooting range and hunting.

- Comfort and flexibility of wear even during prolonged use.
- Simplified adjustment thanks to articulated arms.
- The double-thickness headband (outer rubber side and inner foam side) allows for ergonomic wearing that fits perfectly on the head, even over a protective helmet.
- Complies with European Standard CE2754
- SNR: 26

The SNR (Single Number Rating) value provides information on the protective effect of hearing protection products. It is an average insulation value that is calculated from all relevant frequencies. For example, noise-canceling headphones or earplugs with an SNR of 26 will reduce the noise level the wearer is exposed to from 100 dB to 74 dB.

The technical guide to noise canceling headphones explains the different points to take into consideration when purchasing your hearing protection for hunting and sports shooting.
