A 100% natural beech tar

Eurohunt beech tar is made exclusively from **pure beech tar** , without any added additives or pheromones. This natural formulation is valued for its attractiveness to **wild boar** and **deer** , while retaining the traditional properties of beech tar.

Excellent odor diffusion

Its distinctive scent attracts large game from long distances. When applied regularly to rubbing trees or feeding areas, it promotes the use of these areas and encourages natural rubbing behaviors.

Semi-fluid texture, easy to apply

Thanks to its medium consistency, the product spreads easily on tree trunks while providing good adhesion. This texture allows for simple application using a brush or directly from the container, depending on preferred method of use.

Ideal for rubbing trees

Beech tar is primarily used on trees serving as rubbing surfaces and in feeding areas. Regular application helps maintain high attractiveness throughout the season.

Professional packaging

Eurohunt beech tar is packaged in **5-liter (6 kg) containers** . **The price shown is for one container** , but this product is **sold exclusively in cartons of 4 containers** , a packaging option suitable for retailers, hunting associations, and land managers.

FAQ

Does this tar contain pheromones?

No. It is pure beech tar, without additives or pheromones.

On which animals is it effective?

It is intended to attract primarily wild boars and deer to rubbing trees and feeding areas.

Is the product sold individually?

The price shown is for a 5-litre (6 kg) container, but this product is sold exclusively in cartons of 4 containers.
