The volumetric lever powder dispenser from Lee Precision.

Built with foolproof solidity, this powder dispenser embodies exceptional precision and durability. Its body, shaped by diamond machining under high pressure, ensures unrivaled reliability. The meticulously machined rotor drum is cast in brass, a naturally anti-static and spark-resistant material.

Say goodbye to cut powder and jerky movements. Thanks to a soft elastomer cloth, the dosing chamber delivers the powder without cutting it, ensuring surprisingly smooth operation. The major advantage lies in uniform loads, guaranteeing unrivaled precision.

Its micrometric measuring chamber, easily adjustable and readable, allows the quantity of powder to be precisely adjusted. Made from black anodized aluminum, this chamber features a laser-etched scale, providing permanent readability. The brass micrometer thimble, engraved with 0.01 cm3 graduations and equipped with a removable trigger lock, is ideal for adjusting each load, approximately 1/10 of a grain, perfect for careful metering.

In addition, it incorporates a removable hopper with an on/off valve, facilitating the quick return of unused powder to its original container or the change to another type of powder. This hopper feeds a pre-measurement chamber, ensuring dosing accuracy regardless of the powder level in the hopper, eliminating the need for any other powder control devices.

Finally, its advantage lies in the possibility of using standard Lee quick-change drums (reference # 90453). These economical drums can be pre-configured to your preferred load and swapped out in seconds, providing unparalleled adaptability.
