Extreme grip and precise hold for demanding terrain.

The **Beretta Arabuko GTX boots** are designed for use on **steep terrain** and in technical environments. Made of **oily nubuck** with a **GORE-TEX** membrane and **Vibram®** sole, they offer waterproofing, grip, and a precise fit thanks to the **BOA®** Fit system.

- **Upper:** Oily Dakar nubuck, Cordura®, PU-coated split leather, Superfabric®
- **Membrane:** GORE-TEX Sierra More Season
- **Closure:** BOA® Fit System micro-adjustable
- **Outsole:** Vibram® Bristol
- **Insole:** Ortholite® 2D - 5 mm
- **Height:** 20 cm (size 42)
- **Weight:** 750 g (size 42)
- **Composition:** 52% nylon / 48% leather

Maximum grip on rough terrain

In damp undergrowth, on scree slopes, or steep trails, stability makes all the difference. The **Vibram® Bristol sole** incorporates a **full protective band** and a lugged tread pattern designed to provide **powerful traction**. The grooves promote mud shedding (self-cleaning effect), while the wings at the front and heel enhance grip both uphill and downhill.

Waterproof and breathable GORE-TEX

Thanks to the **GORE-TEX Sierra More Season** membrane, these boots provide **lasting waterproofing** while allowing internal moisture to escape. In other words, your feet stay dry, even during extended periods in cold or rainy weather. A key advantage for long days outdoors.

Precise fit with BOA® Fit System

The **BOA® Fit System** allows for **quick and even micro-adjustments**. With a simple movement, you can adjust the tension for perfectly distributed support. This system improves foot stability and reduces pressure points - especially beneficial when the terrain becomes technical.

Premium materials and long-lasting comfort

The **oiled nubuck upper** ensures robustness and abrasion resistance. **Cordura®** and **Superfabric®** inserts reinforce exposed areas. Inside, the 5 mm **Ortholite® 2D insole** promotes shock absorption, breathability, and optimal microclimate management. The result: lasting comfort, even after several hours of walking.

FAQ

Are these boots suitable for winter conditions?

Yes, the GORE-TEX Sierra More Season membrane guarantees waterproofing and good insulation against moisture, making them suitable for cold and wet climates.

Is the BOA® system reliable under heavy use?

The BOA® Fit System is designed to offer a precise and lasting fit. It ensures consistent support and withstands the stresses of regular outdoor use.

What is the weight of a size 42 boot?

The approximate weight is 750g per shoe in size 42, offering a good balance between robustness and walking comfort.
